Sincerely, Saniel Dan Culp President AMP Global Cl	·
Date signed	02/18/2025

Bloomingdale | Chicago

Report of Independent Registered Public Accounting Firm

To Sole Member of AMP Global Clearing, LLC

Opinion on the Financial Statement

We have audited the accompanying statement of financial condition of AMP Global Clearing, LLC as of December 31, 2024, and the related notes (collectively referred to as the financial statement). In our opinion, the statement of financial condition presents fairly, in all material respects, the financial position of AMP Global Clearing, LLC as of December 31, 2024 in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

This financial statement is the responsibility of AMP Global Clearing, LLC's management. Our responsibility is to express an opinion on AMP Global Clearing, LLC's financial statement based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to AMP Global Clearing, LLC in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statement is free of material misstatement, whether due to error or fraud. Our audit included performing procedures to assess the risks of material misstatement of the financial statement, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

We have served as AMP Global Clearing, LLC's auditor since 2009.

Bloomingdale, IL February 18, 2025

Michael Cogliana CPA, P.C.

NOTES TO FINANCIAL STATEMENTS

1. Nature of operations and summary of significant accounting policies

Nature of Operations

AMP Global Clearing LLC (the "Company") was formed as a limited liability company under the laws of the State of Illinois on May 28, 2009. Effective June 4, 2010, the Company was registered with the Commodity Futures Trading Commission ("CFTC") and became a member of the National Futures Association ("NFA"). The Company conducts business as an omnibus futures commission merchant ("FCM"). An FCM is an organization that engages principally in executing transactions for customers.

Government and Other Regulation

The Company's business is subject to significant regulation by governmental agencies and self-regulatory organizations. Such regulation includes, among other things, periodic examinations by these regulatory bodies to determine whether the Company is conducting and reporting its operations in accordance with the applicable requirements of these organizations.

Basis of Presentation

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP") as detailed in the Financial Accounting Standards Board's Accounting Standards Codification ("ASC").

Revenue Recognition

All revenues are recorded in accordance with ASC 606, which is recognized when: (i) a contract with a client has been identified, (ii) the performance obligation(s) in the contract have been identified, (iii) the transaction price has been determined, (iv) the transaction price has been allocated to each performance obligation in the contract, and (v) the Company has satisfied the applicable performance obligation over time.

Commission and sundry income is earned by providing trade facilitation, clearance and settlement, custody, and trade administration services to customers. Acting as an agent, commission income is generated by the trade facilitation from the Company's clients' purchases and sales of derivatives on exchanges, through the purchases of various investment products such as options and commodity transactions. In return for such services, the FCM charges a commission and related costs. Revenues recognized under commission income consist of one performance obligation which is satisfied on trade date.

Company does not have any obligations for returns or refunds. No warranties or guarantees are offered.

Excess USD funds beyond those required by brokerage and cash requirements are invested in US Treasury Bills that are held with BMO Bank. The US Treasury Bills earn interest at the rate given by the bank at the time of purchase until maturity. The price is mutually agreed upon between the Company and BMO Bank and is based on current market rates. The interest revenue is recognized on a daily basis though the maturity date of the US Treasury Bills, and is calculated based on the daily settlement price (marked-to-market). Upon maturity the basis and total interest from the US Treasury Bill is received by the Company.

NOTES TO FINANCIAL STATEMENTS

1. Nature of operations and summary of significant accounting policies (continued)

Income Taxes

The Company does not record a provision for income taxes because the member reports his share of the Company's income or loss on his income tax return. The financial statements reflect the Company's transactions without adjustment, if any, required for income tax purposes.

The Company's income tax returns are subject to examination by the appropriate tax jurisdictions. As of December 31, 2024, the Company's federal and state tax returns generally remain open for the last three years.

Translation of Foreign Currency

Assets and liabilities denominated in foreign currencies are translated into United States dollar amounts at the yearend exchange rates. Transactions denominated in foreign currencies are translated into United States dollar amounts on the transaction date. Adjustments arising from foreign currency transactions are reflected in the statement of income.

Fixed Assets

The building and building improvements are recorded at cost are being depreciated using the straight-line method over their estimated useful lives.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Company's management to make estimates and assumptions that affect the amounts disclosed in the financial statements. Actual results could differ from those estimates.

2. Customer funds

The Company maintains bank, securities and brokerage accounts on an omnibus basis for client funds on deposit. At December 31, 2024, the balances of such accounts were approximately \$85,272,000 USD. The customer fund payable at December 31, 2024 was approximately \$69,181,000 USD.

The Company also maintains bank and brokerage accounts on an omnibus basis for client funds trading foreign commodity futures (CFTC Regulation 30.7). At December 31, 2024, the balances of such accounts were approximately \$1,880,000 USD. The customer funds payable for these accounts, at December 31, 2024, were approximately \$1,444,000 USD.

NOTES TO FINANCIAL STATEMENTS

3. Off Balance Sheet Risk and Concentration of Credit Risk

Customer activities

In the normal course of business, the Company executes transactions for the accounts of its customers. These activities may expose the Company to off balance sheet risk in the event the customer is unable to fulfill its contracted obligations and the Company has to purchase or sell the financial instrument underlying the contract at a loss.

These transactions are cleared through a clearing broker. Futures contracts are commitments to either purchase or sell a commodity at a future date for a specified price and may be settled in cash or through delivery of the underlying financial instrument. Margin deposit requirements required to enter into such contracts are generally small in value in comparison to the gross value of the underlying futures contract. Margin is a good faith deposit from the customer that reduces the risk to the Company of failure by the customer to fulfill obligations under these contracts. To minimize exposure to risk due to market variation, the Company requires customers to maintain margin collateral in compliance with various regulatory and internal guidelines. The Company monitors required margin levels on a daily basis and pursuant to guidelines require customers to deposit additional collateral or to reduce or liquidate positions when necessary. The Company believes that collateral held at December 31, 2024 was adequate to minimize the risk of material loss that could be created by customer positions held at that time.

Concentration of credit risk

In the normal course of business, the Company maintains its cash balances in financial institutions, which at times may exceed federally insured limits. The Company is subject to credit risk to the extent any financial institution with which it conducts business is unable to fulfill contractual obligations on its behalf. Management monitors the financial condition of such financial institutions and does not anticipate any losses from these counterparties. Management believes the Company is not exposed to any significant credit risk on cash.

Off balance sheet risk

Futures and currency forward transactions may expose the Company to off-balance sheet risk in the event that adverse market variations on open commodity futures contract, options and foreign currency forward positions result in significant losses or require additional margin deposits. Futures and currency forward trading involved a great deal of leverage whereby a relatively small amount of margin deposits may be utilized to trade contracts with notional values which are many times in excess of such margin deposits. Consequently, futures and forward currency transactions may expose the Company to material off-balance sheet risk in the event that adverse market variations on open positions result in significant losses or require additional margin deposits. As a consequence, the Company may be required to deposit additional cash, marketable securities or other collateral, or liquidate its futures positions with its clearing FCM.

Foreign currency risk

The Company may be exposed to foreign currency fluctuations due to customer activities. The value of financial instruments (denominated in or subject to exposure of foreign currencies) may fluctuate as a result of changes in foreign exchange rates. The Company is subject to the risk that those foreign currencies may decline in value relative to the base currency of the Company.

NOTES TO FINANCIAL STATEMENTS

4. Net capital requirement

As an FCM, the Company is subject to the net capital requirements under Regulation 1.17 of the Commodity Exchange Act ("CEAct"). Under these provisions, the Company is required to maintain minimum net capital, as defined, of the higher of \$1,000,000, or the sum of 8 percent of customer and 8 percent of non customer risk maintenance margin requirements on all positions. Adjusted net capital and risk maintenance margin requirements change from day to day. At December 31, 2024, the Company had a net capital requirement of \$1,000,000 and adjusted net capital of approximately \$16,295,000 or an excess of approximately \$15,295,000. At December 31, 2024, the Company was in compliance with these capital requirements. The net capital requirements could effectively restrict the payment of cash distributions, the making of unsecured loans to its owners or affiliates and the purchase by the Company of its own membership interests.

5. Loans Payable

The company has no loans payable at the time of this audit.

6. Fixed Assets

The building and building improvements are recorded at cost are being depreciated using the straight-line method over their estimated useful lives.

Property and equipment at December 31, 2024 consists of following:

Building	734,438
Building Improvements	147,850
	882,288
Less accumulated depreciation	(468,089)
Total	414,199

2024 Annual Depreciation totaled \$44,114.

NOTES TO FINANCIAL STATEMENTS

7. Investments at Fair Value

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the "exit price") in an orderly transaction between market participants at the measurement date.

In determining fair value, the Company uses various valuation approaches. ASC 820, "Fair Value Measurements and Disclosures" establishes a fair value hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Company.

Unobservable inputs reflect the Company's assumptions about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. ASC 820 requires use of a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels: quoted market prices in active markets for identical assets or liabilities (Level 1); inputs other than quoted market prices that are observable for the asset or liability, either directly or indirectly (Level 2); and unobservable inputs for an asset or liability (Level 3).

ASC 820 did not have a material impact on the Company's financial statements. At December 31, 2024, all of the Company's investments are considered Level 1 financial instruments.

The following table presents the Company's fair value hierarchy for those assets measured at fair value on a recurring basis as of December 31, 2024:

Level 1

Securities Owned:

US Government Securities:

Treasury Bills, Maturity dates between Jan 02, 2025 and Aug 07, 2025

\$62,593,331

8. ASC 280 - Segment Disclosure

The Company is engaged in a single line of business that engages principally in clearing transactions for customers. The Company has identified its Chief Executive Officer as the chief operating decision maker ("CODM") who uses net income to evaluate the results of the business to manage the Company. Additionally, the CODM uses excess net capital (see Note 4), which is not a measure of profit and loss, to make operational decisions while maintaining capital adequacy, such as whether to reinvest profits or pay member draws. The Company's operations constitute a single operating segment and therefore, a single reportable segment, because the CODM manages the business activities using information of the Company as a whole. The accounting policies used to measure the profit and loss of the segment are the same as those described in the summary of significant policies.

9. Subsequent events

These financial statements were approved by management and available for issuance on the date of the Independent Registered Public Accounting Firm Report. Subsequent events have been evaluated through this date.
